

(From Roger Madsen 24/4/2025)

I recently found at the Powerhouse Museum 3 images of the John Madsen Medal awarded by the Institution of Engineers. I have attached the original photo of JPVM talking to Sir Harry Brown on the Showboat in 1952 (Sir Harry was very senior at the PMG & with radio licencing in the 1920's- 1930's- he was on the RRB at the outset).[Sir Harry lived in Roseville as well, not far from JPVM]

I have recently been looking at the history of the WCIC (Water Conservation & Irrigation Commission) where JPVM was the consulting Electrical Engineer 1912-1916 & involved with the power station at Yanco to supply electricity to Leeton (the cannery & butter factory) & the MIA.
